

Continuous Support

Dedicated to our Customers

Proven On-Time

Top Quality ISO 9001:2008

Quick Response

CUSTOM TANKS

Expanded & Reservoir Tanks

Materials

Mild steel, aluminized steel, stainless steel and aluminum

Styles of reservoir tanks:

JIC, "L" shape, "T" shape, open top, vertical PUK reservoirs

Welding

Seam welded: longitudinal & circumferential

Robotic welding & MIG/TIG welded construction

Equipment

Lasers

CNC controlled forming equipment

CNC controlled welding equipment

Laser Cutting

We provide Fuel Tanks with capacities ranging from 1 to more than 300 gallons

We can manufacture everything from a simple two-part tank strap to fuel tanks with as many parts as needed by the end user

Cardinal maintains a complete engineering department to assist you in developing the most economical and practical fuel tank design for your application. If your specialty fabricated tank requires sight bulbs, filters, straps or any other additional parts added, we will fabricate them if possible, and if not, we will order and install them for you. Fully assembled and tested "drop-in" tanks and reservoirs in assembly line ready condition.

Engineering Assistance

Prototypes

100% tested fuel tanks & hydraulic reservoirs

Reservoirs meet all J.I.C., N.F.P.A., ASLE & ASME standards

Custom finishing or primer

Fully assembled

**"We don't just build tanks;
we build the end product."**
